

# HEART ATTACKS HAVE BEGINNINGS

## WHAT ARE THE EARLY SYMPTOMS?

Remember, people may or may not experience any or all of these symptoms.

**EHAC (Early Heart Attack Care)** is knowing the subtle danger signs of a heart attack and acting upon them immediately – **BEFORE HEART DAMAGE OCCURS.**

**If you experience any of these symptoms, CALL 9-1-1.**

Having an ambulance come to you starts your care faster than walking into the ER.
