

KNOW YOUR RISK

\$75 Vascular Screening Special (a \$99 value)

- Abdominal aortic aneurysm
- Carotid artery disease (stroke)
- Peripheral artery disease

During a vascular screen critical blood vessels in your neck area, your abdomen and your ankles are checked for telltale signs of restriction or weakness. If these problems are detected early, they can be treated before they become life-threatening. This painless, non-invasive and inexpensive screening could save your life.

Call the Iowa Heart Center office most convenient for you to schedule an appointment!
